

# COMPANY PROFILE

The future is now:  
Software Development  
Building the digital world of tomorrow  
Collaborative and innovative solutions.

# WELCOME TO OUR COMPANY

---

## **The Arabian Experts Company**

Has been established in 1994 with expertise in several sectors and industries.

Our biggest pride is in maintaining the highest retention rate and the highest return client rate in the industry. If anything, this shows continued trust and satisfaction with our services and products.

Amongst our most important landmarks was receiving the “Quality in Software” certification from the A.U.C (School of Business, Economics & Communication) in 2001, and being selected by the Ministry of Communication and Information Technology to develop the E-Gov project for the Egyptian General Taxes Authority in 2002 and The Egyptian Travel Agents Association in 2011.

# ABOUT US

The name of the company was changed to (Quality Experts) in 2023 to comply with the name of Our branch in Dubai – United Arab Emirates, which was established in the same year to serve as a new start for us in the world of systems and information.

# OUR FIRST STEP

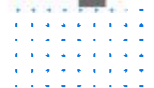

The automation of the business cycle at Al-Hawari Iron and Steel Group was our first production. During this time, we established our vision that technical support and updates should be provided without limitations and without any time or financial conditions. We believe that meeting all customer demands and providing speedy technical support and development for the programs they need, regardless of their location, is crucial to ensuring our customers can rely on the applications we produce. Our primary goal is to produce applications that are strong and complete to meet the needs of our customers. We aim to establish a long-lasting relationship with our customers, where they become our partners and friends.

# TOP PROJECTS

- Developing the work strategy of the official website of the Egyptian Travel Agents Association.
- Compliance with the state's strategy towards the digital transformation of the chamber's services to member companies through the website and building mobile applications.
- The beginning was through the Hajj system for the year 1440 AH, electronic payment for the seriousness of the reservation.
- Linking with Banque Misr with API technology and instant deposit.
- Cooperation with the Egyptian Ministry of Tourism and the Chamber's portal for integration and tourism transport capacity at the level of the Republic.
- Successes continued through the digitization of services down to the system of tourist travel permits.
- Linking the system to the entry of the numbers and nationalities of tourists to Hurghada and Sharm El Sheikh airports.

غرفة شركات ووكالات السفر والسياحة

- The pilgrims terminal at Jeddah International Airport is one of the most important projects carried out by our company through the automation of passenger luggage detectors in cooperation with the American company Autoclear and the Dutch company Vander Land.

---

- Cooperation with the Ministry of Environment Water & Agriculture in the Kingdom of Saudi Arabia to implement a system of management, accounting, and control of access automatically to sewage tanks received for various discharge stations.

---

-AutoZel.com® a website founded in 2017 in Dubai, it is simply the fastest and easiest way to buy or sell used cars online.  
- Ranked the fastest growing site in the UAE.

- Building the official website of the Kuwaiti Society for the Advancement of Arab Childhood in 2014.
- It is classified as a public benefit association that aims to provide knowledge on the development of early childhood and education in the Arab world and to help develop new scientific research suitable for this stage.
- In addition to analytical, diagnostic, and technical materials, in an attempt to illuminate aspects that have not been addressed by contemporary governmental or educational institutions.

- 
- In continuation of the success and cooperation with the Kuwaiti Society for the Advancement of Arab Childhood, work was assigned to our company to carry out a project to build an electronic website for the Arab Childhood magazine.

- 
- Mazad Basha is a website that specializes in live and direct car auctions through the Internet and mobile applications. The site offers services in Arabic, English, and Kurdish languages to cater to the countries it covers, namely Iraq, Jordan, and the United Arab Emirates.

- The project's concept has been expanded by establishing modern car inspection centers, which are interconnected through mobile applications. These centers use the latest technology to prepare a technical report of the vehicle inspection, which can be accessed through a QR code. This report carries secure data of the technical inspection report of the vehicle.
- Technical studies are underway with state agencies and the Iraqi government to promote the project. The project has already obtained the ISO quality certificate.

- 
- In 2016, our company undertook the project of developing the largest public site in Africa and the Middle East by developing the Website for fans of the Egyptian club Al-Ahly [www.el-ahly.com](http://www.el-ahly.com)
